

Making IT work for you

Your Partner in CMMC Compliance

Ensuring Robust Cybersecurity for Today's Businesses

CMMC Compliance Services

We understand the importance of achieving and maintaining Cybersecurity Maturity Model Certification (CMMC) compliance for government contract work. As your trusted Managed Service Provider (MSP), we offer comprehensive services to guide you through the CMMC process, ensuring your organization meets the necessary standards to secure and maintain valuable government contracts.

Understanding the New CMMC Changes FOR 2026

Beginning in November 2025 and actively enforced in 2026, the landscape for government contractors is changing. CMMC compliance will become a contractual and an enforceable requirement to win contracts. This means:

- *Contractors must meet the appropriate CMMC level to win government contracts.*
- *CMMC is now recognized as the foundation for contractor cybersecurity.*

Key Requirements

- Implementation of risk-based cybersecurity frameworks is required.
- Continuous monitoring and incident reporting are essential.
- Cybersecurity failures will be reported as performance issues, affecting your Contractor Performance Assessment Reporting System (CPARS) score, akin to a government credit score.
- Compliance requirements flow down to subcontractors, ensuring the entire supply chain is secure.

Expanding Beyond DoD

CMMC is not limited to the Department of Defense (DoD); it is spreading across the entire federal government.

A CMMC-like framework is being applied to Controlled Unclassified Information (CUI) data for non-DoD contracts and will apply immediately to new contracts.

Jaydien Network Solutions offers tailored compliance packages to help you navigate these changes and achieve CMMC compliance effectively.

	NetProtectIT Compliance-as-A-Service (CaaS) \$300/Device (Up To 50 Devices)
CMMC Assessment <i>(Project Work)</i>	Business review to identify FCI/CUI exposure, review contracts and data locations, and assess your environment against CMMC Level 1 or NIST SP 800-171 / Level 2 requirements. Review tools, controls, and policies to deliver a risk register, executive summary, readiness scorecard, gap report, remediation roadmap, and budget estimate for CMMC readiness.
CMMC Readiness <i>(Project Work)</i>	Define your CUI boundary and data flows, then harden your environment across Microsoft 365, endpoints, and infrastructure while implementing controls like MFA, least privilege, logging, encryption, and vulnerability management. You'll receive core compliance documentation, including your System Security Plan (SSP), POA&M, incident response plan, and key security policies covering access control, logging and change management.
UNLIMITED DEVICE SUPPORT & MAINTENANCE	Unlimited Remote Support: Phone, Email & Remote Sessions Regular Maintenance: Security & Stack Management Discounted Hourly Rate: On-site/Projects/After-Hours: \$150/hr. Plus Any Travel Time (1 hr. Min Charge)
ONGOING CMMC CERTIFICATION MAINTENANCE	Ongoing management of your security stack, including log monitoring, vulnerability and patch reporting, access reviews, backup verification, policy updates, and evidence collection POA&M tracking and quarterly compliance reviews.
FAST RESPONSE TIMES	Average response time of less than 15 minutes.
MANAGED EDR ANTIVIRUS	Next Generation EDR (Endpoint Detection & Response) AI-Powered Antivirus.
MDR SECURITY	Managed Detection & Response (MDR) - 24/7 Cybersecurity Service that Continuously Monitors, Detects, and Rapidly Responds to Threats to Stop Attacks Before They Cause Damage.
AUTOMATED DEVICE PATCHING	Automatic Microsoft & 3rd Party Patching of Security Vulnerabilities and Bugfixes
WEB CONTENT FILTERING	Improves Employee Productivity & Network Security by Blocking Time Wasting Websites
PROACTIVE DEVICE MONITORING	Proactive 24x7 Monitoring of All Devices to Reduce Downtime & Improve Security
QUARTERLY BUSINESS REVIEWS	Receive Virtual CIO Expertise Without The Payroll Cost Regular Review of IT Goals, IT Roadmap and IT Strategy to Help Improve IT Efficiency and Meet Operational Goals
SERVER ADD-ON	Proactive 24x7 Monitoring and Regular Maintenance of your Server Device. Unlimited Remote Support: Phone, Email & Remote Sessions \$225 - Each Windows Server
